

DIAMOND

International Constructions

Diamond International Constructions is a fully foreign-managed Vietnamese company. Our strength comes from the safe and efficient utilization of latest technology, machinery, and equipment, using a workforce of highly trained and experienced professionals. We aim to deliver highest quality products, solutions, and construction services that comply with international standards.

Scaffolding and Formwork Solution

We are local partner of RMD Kwikform (www.rmdkwikform.com), one of the world's leading formwork and scaffolding specialists from United Kingdom, with over 60 years experience.

Our solutions range from fast-track to heavy duty, which, along with our services, greatly improve site safety, speed, quality, and efficiency, and have proven their effectiveness all over the world.

Concrete Technology

As local representation of Max Frank GmbH & Co. KG (www.maxfrank.com) from Germany, we provide innovative concrete technology to Vietnam.

Max Frank's products include mechanical systems to improve concrete quality, special and permanent formwork, reinforcement and precast systems, sealing systems and sound insulation.

Cellular Concrete Solutions

Our cellular concrete solutions and services are based on the innovative, efficient and very economical LithoPore (www.lithopore.com) foaming agent from Germany.

We offer cellular concrete products like blocks and precast elements, and application services for insulation roofs, floor screed, grout and cast in-situ buildings.

Besides, we provide LithoPore Cellular Concrete Technology from small mobile equipment up to complete plants.

About Us and Our People

Diamond International Constructions is built on a professional network of experienced senior project managers, design professionals, and skilled labor. Together, we focus our experiences of 30 countries worldwide on your project.

Our greatest asset is in the way we leverage the synergy between our highly qualified and experienced professionals and our high-quality equipment. This enables us to tackle any job and overcome all obstacles.

Our experienced team, consisting of skilled technicians, trained foreign managers with international expertise and highly qualified civil and structural engineers, ensures formwork solutions that fit your needs on site; focusing on quality, speed, budget and manpower resource optimization - never sacrificing safety.

Diamond International Constructions is committed to service, performance, and quality in the delivery of excellence on your projects. We handle projects of all sizes using the same professional attitude, well-organized approach and ability to set priority to meet project goals and milestones.

It is our attention to detail and quality that brings the level of our service above that of our competitors.

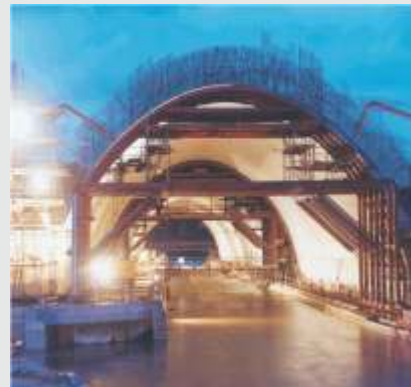

We at Diamond International Constructions focus on:

- Maintaining strong leadership, project management, and teamwork
- Developing technical and service expertise to deliver our promises
- Driving ongoing development of updated processes and tools
- Generating innovative services, connections, and solutions
- Strengthening our reputation through value and reliable service excellence.

Our values of engagement are:

- Professionalism
- Performance
- Efficiency
- Ethics
- Quality and
- Safety

Our Services and Solutions

Formwork and Scaffolding

- Heavy duty scaffold up to 1,000 kN legload
- Aluminum and steel system scaffold
- Flying forms and Table forms
- Large shoring towers
- Light, quick release scaffold
- Wall and column formwork
- Modular formwork
- Gang form and Jump form
- Special purpose and customized formwork
- Access towers and scaffold
- Hydraulic Jacking Systems
- Auto climbing formwork systems
- Lightweight beams
- Heavy duty beams and soldiers
- Fully recyclable plastic form-skin
- High quality densified plywood
- Safety screens
- Accessories such as tie rods, dowels, etc

Mechanical Technology for Concrete

- Fibre-Reinforced Concrete Distance Tubes, Sealing Cones and Spacers
- Reinforcement Connection Systems, Transverse Force Dowel Systems and Threaded Couplers
- Sealing Systems and Waterstops
- Blockout of Apertures and Holes
- Crack-Control and Expansion Joints

- Zemdrain® controlled permeability formliner
- Cast-in Channels, Sockets and Inserts
- Precast Lifting technology
- Acoustic Insulation Technology

Cellular Concrete

- Cellular Concrete Blocks
- Floor Screed
- Heat Insulation Roofs
- Inter-Space Filling (Grouting) of all kinds, including infrastructural applications like Quay backfill and Bridge landings etc.
- Lightweight Precast Panels and Elements
- Cast in-situ Partitions
- Complete Townhouses and Villas made of Cellular Concrete

Services

- Consulting
- Engineering Design
- Project Planning and Optimization
- Inspection
- Supply (import and transportation to site)
- Preassembly
- Fabrication of customized formwork
- Training and Supervision on site
- Complete Installation Service

Sa Machado Bridge - Spain

Saadiyat Expressway - UAE

Saadiyat Expressway - UAE

Saadiyat Expressway - UAE

Choi Wan Road / Jordan Valley Bridge - Hong Kong

Raine Square - Australia

Thanks to our professional experience and the valued experiences of our partners and suppliers, we are capable in offering you the right solution for all common structures:

Infrastructure:

- Bridges
- Culverts
- Dams
- Tunnels

Building:

- High-Rise Buildings
- Commercial
- Industrial
- Leisure
- Stadiums
- Hangars
